

Collagen Plus

A unique formula that promotes glowing, healthy skin, and reduces fine lines and wrinkles to help fight the visible signs of aging.*

Bovine Collagen Peptides
Nicotinamide Riboside

Peach Ceramides
Currant Polyphenols

What it is

Collagen Plus combines collagen peptides with nicotinamide riboside and botanical extracts, including natural ceramides from Japanese white peach and polyphenols derived from blackcurrant and redcurrant, to provide the most comprehensive “skin-care-from-within” product on the market. Collagen Plus comes as a wonderful passion berry-flavored powder that easily mixes with water or your beverage of choice.

How it works

- ✓ Enhances the health of skin, hair, and nails – see a difference in as soon as four weeks*
- ✓ Promotes the elasticity and strength of the skin*
- ✓ Reduces fine lines and wrinkles*
- ✓ Lightens and brightens skin pigment*
- ✓ Enhances skin texture and reduces coarseness*
- ✓ Supports hydration for dry, rough, scaly skin*

Who it benefits

- ✓ It helps maintain the appearance of youthful skin in younger individuals*
- ✓ It promotes cellular repair in those who have aging skin*
- ✓ It benefits anyone who spends too much time in the sun or is exposed to wind, air pollution, or blue screens – all of which can contribute to skin aging*

How it differs from collagen-only products

Collagen products provide connective tissue support for skin, hair, and nails.* This helps the skin maintain tone and decreases fine lines and wrinkles.* The PeptPure® ingredient in Collagen Plus comes from grass-fed cows and contains low-molecular weight, hydrolyzed collagen – both type I and III – the forms of collagen typically found in the skin.

But what do the other active ingredients in Collagen Plus bring to the table?

- ✓ Nicotinamide riboside and betaine support skin regeneration and repair on the cellular level.*
- ✓ HydroPeach™ (from Japanese white peach) provides natural plant-based ceramides – the waxy lipids found under the surface of the skin – providing a natural barrier to help the skin retain moisture.*
- ✓ MitoHeal® (polyphenols derived from blackcurrant and redcurrant) reduces hyper-pigmentation of the skin and makes the skin smoother and less coarse.*
